LIVE CLASSES FOR KIDS

Class Checklists

These handy-dandy checklists can be used in multiple ways for your planning purposes! Feel free to print only the pages you need for your homeschool planner to keep track of the classes you have taken and/or to plan for future learning opportunities.

Option 1: The Dated Checklist
This list is ordered chronologically according to the date each class was filmed.

- Use it to keep track of upcoming lesson dates if you plan to attend live.
- Use it to pick and choose lessons that relate to things you are learning about in your homeschool or classroom.
- Use it to pick and choose classes based on the interests of your students.

The dates will help you easily locate the class replays in the No Sweat Nature Study Video Library.

Option 2: The Category Checklists
You'll find six category checklists. Three that list classes that fit into the broad subjects of plants, animals, and earth & space science - and three that list the classes that fit into seasonal learning, cross-curricular topics, and special events. If a particular class topic fits into multiple categories, you will see it duplicated on multiple checklists.

- If you're studying a certain topic in your home or classroom, the subject lists can help you find specific lessons that support your learning.
- The seasonal list can help you find fun additions when holidays roll around or seasons change.
- The cross-curricular list includes classes that make strong connections to other subjects like math, history, art, economics, or biographies.
- The special events list is most useful if you're trying to catch every single lesson in the membership. You would want to print this list to go along with the chronological list to have a complete listing of all the classes at your fingertips.

**An asterisk signifies 2024 classes that will become available as the year progresses.*
^ This symbol indicates that the classes were a part of a special event.

Chronological Checklist

___ Oct 1, 2019: Cattails

___ Nov 5, 2019: Squirrels

___ Dec 3, 2019: Lichens

___ Jan 7, 2020: Birds in Winter

___ Feb 4, 2020: Hibernation

___ Mar 3, 2020: Stinky Critters

___ Apr.7, 2020: Erosion

___ May 5, 2020: John James Audubon

___ Jun 2, 2020: The Color Wheel in Nature

___ Jul 7, 2020: The Water Cycle

___ Jul 28, 2020: Hopping Insects

___ Sep 1, 2020: Vines

___ Oct 6, 2020: Hay Bales

___ Nov 3, 2020: Animal Tracks

___ Dec 1, 2020: Minerals

___ Oct 15, 2019: Photosynthesis

___ Nov 19, 2019: Seed Dispersal

___ Dec 17, 2019: Christmas in Nature

___ Jan 21, 2020: Sedimentary Rocks

___ Feb 18, 2020: Cones

___ Mar 17, 2020: New Growth in Nature

___ Apr 21, 2020: Riparian Zone

___ May 19, 2020: Bioluminescence

___ Jun 16, 2020: Caves

___ Jul 21, 2020: Bird Nests

___ Aug 18, 2020: Night Views

___ Sep 15, 2020: Patterns in Nature

___ Oct 20, 2020: Bats

___ Nov 17, 2020: Squashes & Gourds

___ Dec 15, 2020: Evergreens

___ Jan 5, 2021: Geothermal Features

___ Feb 2, 2021: Decomposition

___ Mar 2, 2021: Succulents

___ Apr 6, 2021: Fungi

___ May 4, 2021: Horses

___ Jun 1, 2021: Oceans

___ Jul 6, 2021: Monocots & Dicots

___ Aug 3, 2021: Forest Fires

___ Sep 7, 2021: Henry David Thoreau

___ Oct 5, 2021: Owls

___ Nov 2, 2021: Volcanoes

___ Dec 7, 2021: Predators & Prey

___ Jan 4, 2022: The Tundra

___ Feb 1, 2022: Shadows

___ Mar 1, 2022: Numbers in Nature

___ Apr 5, 2022: Worms

___ May 3, 2022: Camouflage

___ Jun 7, 2022: Herbs

___ Jan 19, 2021: Foxes

___ Feb 16, 2021: Waterfowl

___ Mar 16, 2021: Rivers & Brooks

___ Apr 20, 2021: Food Chains

___ May 18, 2021: Pond Insects

___ Jun 15, 2021: Reptiles

___ Jul 20, 2021: Fish

___ Aug 17, 2021: Mosses

___ Sep 21, 2021: Landforms

___ Oct 19, 2021: Carnivorous Plants

___ Nov 16, 2021: Legumes

___ Dec 21, 2021: Reindeer

___ Jan 18, 2022: Polar Bears

___ Feb 15, 2022: Tree Bark

___ Mar 15, 2022: Wetlands

___ Apr 19, 2022: Soil

___ May 17, 2022: Gastropods

___ Jun 21, 2022: Crepuscular Animals

___ Jul 5, 2022: Shells

___ Aug 2, 2022: Berries

___ Sep 6, 2022: Shapes in Nature

___ Oct 4, 2022: The Harvest Moon

___ Nov 1, 2022: Mice

___ Dec 6, 2022: Snowflakes

___ Jan 3, 2023: Wild Dogs

___ Feb 7, 2023: Wild Cats

___ Mar 7, 2023: Vernal Pools

___ Apr 4, 2023: Thunderstorms

___ May 2, 2023: What's That Smell?

___ Jun 6, 2023: Garden Pests

___ Jul 5, 2023: Seashore Animals

___ Aug 1, 2023: Night Bloomers

___ Sep 5, 2023: George W. Carver

___ Oct 3, 2023: Gliding Mammals

___ Nov 7, 2023: Beavers

___ Dec 5, 2023: Moose

___ Jul 19, 2022: Turtles

___ Aug 16, 2022: Whales & Dolphins

___ Sep 20, 2022: Gregor Mendel

___ Oct 18, 2022: Really Weird Plants

___ Nov 15, 2022: Root Vegetables

___ Dec 20, 2022: Christmas Spices

___ Jan 17, 2023: Planets

___ Feb 21, 2023: Sandstone

___ Mar 21, 2023: Salamanders

___ Apr 18, 2023: Strawberries

___ May 16, 2023: Bees

___ Jun 20, 2023: Brambles

___ Jul 18, 2023: Seashore Plants

___ Aug 15, 2023: Macroinvertebrates

___ Sep 19, 2023: Black Bears

___ Oct 17, 2023: Myriapods

___ Nov 21, 2023: Nature Idioms

___ Dec 19, 2023: Redwood Trees

___ Jan 2, 2024: Yellowstone's Wolves

___ Feb 6, 2024: Simple Machines in Nature

___ Mar 5, 2024: The Rainforest

___ Apr 2, 2024: Tornadoes

___ May 7, 2024: Animal Personification

___ Jun 4, 2024: Garden Helpers

___ Jul 2, 2024: Sharks

___ Aug 6, 2024: Droughts

___ Sep 3, 2024: Nature's Tech Wonders

___ Oct 1, 2024: Monarch Butterflies

___ Nov 5, 2024: Maize

___ Dec 3, 2024: The Cobweb Christmas

___ Jan 16, 2024: Penguins

___ Feb 20, 2024: Sap into Syrup

___ Mar 19, 2024: Endangered Animals

___ Apr 16, 2024: Insect Life Cycles

___ May 21, 2024: Perennial Bulbs

___ Jun 18, 2024: Chickens

___ Jul 16, 2024: Eugenie Clark: Ichthyologist

___ Aug 20, 2024: Symbiosis

___ Sep 17, 2024: Animal Cells

___ Oct 15, 2024: Marsupials

___ Nov 19, 2024: Cranberries

___ Dec 17, 2024: The Shortest Day of the Year
